about me

Since 2007 I have focused my career in the digital environment. I specialise in user interface design for web and mobile apps.

I have participated in several sectors projects such as technology, medicine, nutrition, education, leisure, etc. in which I was able to see first hand the different needs of customers, allowing me to expand my knowledge about the user experience.

I have worked with professionals from different backgrounds with different needs and ways of working, of which I have acquired basic programming skills that allow me to make small changes in .NET, JAVA and PHP projects, and managing version control tools like Subversion and TFS.
